PROFESSIONAL SUMMARY

Computer Science & Engineering undergraduate (B.Tech, graduating 2027) with a strong foundation in Data Structures & Algorithms using C++ and hands-on experience building full-stack applications with React, Node.js, FastAPI, PostgreSQL, and REST APIs. Built AI-powered applications with the Google Gemini API and developing a computer vision system for traffic violation detection. Seeking a software development internship or entry-level role.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Government College of Engineering, Keonjhar | CGPA: 8.0 | Expected Graduation: 2027

Higher Secondary (12th) — Guidance English Medium School, Dumduma, Bhubaneswar — 93%

Secondary (10th) — Modern Public School, Balasore — 95.4%

TECHNICAL SKILLS

Programming Languages: C++ (Data Structures & Algorithms), Python (basics), Java (basics), C

Core CS: Object-Oriented Programming, Database Management Systems (basic SQL), Operating Systems, Computer Networks fundamentals

Web & Databases: React, Node.js, Express.js, FastAPI, REST APIs, JWT, PostgreSQL, Firebase

AI & Machine Learning: Google Gemini API (LLM integration), Machine Learning (basics)

Tools & Practices: Git & GitHub (version control), Vercel, Cloudflare Pages

Soft Skills: Creative Writing, Presentation Skills

PROJECTS

AI TechPrep

github.com/akrout9999-star/ai-mock-interview | Live Demo: ai-techprep.pages.dev

Technologies: React, Vite, FastAPI, Python, PostgreSQL, JWT, Google Gemini API, Cloudflare Pages, Render

- Built a full-stack AI platform using Google Gemini to generate and evaluate adaptive interview questions.
- Developed FastAPI REST APIs with JWT authentication and PostgreSQL storage for interviews and reports.

AI Support Desk

github.com/akrout9999-star/ai-support-desk

Technologies: React, Node.js, Express.js, PostgreSQL, JWT, Google Gemini API, Cloudflare Pages

- Built a full-stack support desk with role-based access, letting customers raise tickets and agents resolve them.
- Integrated Google Gemini API to suggest ticket categories and draft replies, with agent approval.

Attendance Management System

github.com/akrout9999-star/campus_desk_gce_kjr

Technologies: React 18, Firebase (Firestore + Auth), Vite, deployed on Vercel

- Collaborated with a team to design and build a web application for structured student attendance tracking.

Image Metadata Extractor

github.com/akrout9999-star/image-metadata-extractor

Technologies: Python, Pillow

- Built a Python program that extracts available EXIF metadata (format, camera, date-time, GPS) from images.

Traffic Violation Monitoring System — Ongoing

- Developing a computer vision system to detect traffic violations from video, starting with vehicle tracking.

LANGUAGES

Hindi, English, Odia
